

Outdated, underperforming, or poorly integrated AV systems create friction in collaboration, learning, and guest engagement.

We deliver a structured, on-site or remote evaluation of your current AV infrastructure, from conference rooms to classroom displays and sound systems. We identify issues that affect performance, usability, and scalability, then provide a prioritized roadmap to modernize your technology investment.

## Clearer Meetings. Smarter Spaces. Better Experiences.

### AV Hardware & Environment

Inspect displays, projectors, audio systems, and control equipment for lifecycle status, placement, physical condition, and power/cooling sufficiency.

### Performance & User Experience:

Test audio and video quality, latency, and responsiveness under real-world usage scenarios. Evaluate how system layout and room acoustics affect usability.

### Network & System Architecture:

Map AV device connectivity, IP schemes, VLANs, and system topology. Review readiness for scaling and integration with existing network infrastructure.

## WHY CHOOSE US?

### Proven AV Expertise:

We assess AV environments through both a technical and user-centric lens.

### Focused on SMB Environments:

Our approach balances best practices with practical constraints on cost, space, and usability.

### End-to-End Visibility:

From device lifecycle to system diagrams, we deliver a full picture of your AV environment.

### Implementation-Ready Output:

Findings are packaged for easy execution—internally or through DigitalEra's implementation services.

## OUTCOMES YOU CAN EXPECT

We deliver practical insights and clear next steps to improve your physical security systems and obtain:

- Better sound and video quality across key AV spaces
- Improved room layout and environmental readiness
- Accurate diagrams and inventories for future planning
- Clear roadmap for system upgrades or expansion
- Confidence that your AV setup meets user and business needs

## ELEVATING HOW YOU SEE, HEAR & CONNECT

We deliver practical insights and clear next steps to improve your audio/video systems and overall user experience. As part of this assessment, you'll receive:

- ✓ Comprehensive Assessment Report
- ✓ Network & Architecture Mapping
- ✓ Visual Documentation & Inventory

## WHY IT MATTERS

Poor AV performance leads to poor communication, and that costs time, attention, and credibility. We help you take control of your AV environment with clear insights and a roadmap that's built for action.
