

Security systems are only effective if they're properly configured, maintained, and scaled to your needs. Our Security Assessment Service provides a structured evaluation of your organization's video surveillance & access control systems.

Designed for small to mid-sized businesses, this service delivers a detailed review of camera placements, access control coverage, infrastructure resilience, and system performance, with clear recommendations for upgrades and optimization.

Camera & Access Control Infrastructure:

Inventory existing equipment, inspect device condition, placement, coverage, and compliance with best practices.

Performance & Usability Testing:

Assess camera resolution, field of view, retention capacity, and access control response. Simulate threat scenarios to uncover weaknesses in real conditions.

System Architecture & Scalability:

Review system diagrams, cabling, IP schemes, and network design. Evaluate readiness for expansion, device load, and system integration capabilities.

WHY CHOOSE US?

Real-World Security Experience:

Our team blends physical security knowledge with IT infrastructure expertise.

Focused on SMB Environments:

We specialize in assessments that balance performance with cost-conscious recommendations.

End-to-End Visibility:

From access points and cabling to user interface and retention, we assess the full picture.

Future-Ready Planning:

Recommendations consider your current use and your future growth.

OUTCOMES YOU CAN EXPECT

We deliver practical insights and clear next steps to improve your physical security systems and obtain:

- Clear view of system strengths and gaps
- Optimized coverage and camera placement
- Increased system resilience and readiness for scale
- Reduced downtime through proactive recommendations
- Actionable plan aligned with operational and budget priorities

EMPOWERING YOUR ACCESS CONTROL & SECURITY OPERATIONS

We ensure that your security systems enhance, not hinder, your safety, operations, and scalability. As part of this assessment, you'll receive:

- ✓ Assessment Report & Action Plan
- ✓ System Inventory & Visual Mapping
- ✓ Architecture & Network Diagrams

WHY IT MATTERS

Gaps in physical security are often invisible until something goes wrong. We help you uncover what's missing, optimize what's in place, and prepare for what's next.
