

Our Cybersecurity Tabletop Exercise puts your teams and plans to the test in a simulated, low-risk environment that challenges assumptions, sharpens response processes, and reveals hidden gaps in your incident response playbook.

Test Readiness. Expose Gaps. Build Confidence.

These are the main focus areas of our approach:

Roles & Decision-Making:

Clarify responsibilities, handoffs, and communication protocols across executive, legal, HR, IT, and security stakeholders.

Cross-Functional Engagement:

Involve all relevant stakeholders in the process, from technical leads to executives, fostering alignment and ownership.

Scenario-Based Planning:

Run through tailored incident types: supply chain compromise, business email compromise, ransomware, or data loss, reflecting your environment and industry.

After-Action Reporting:

We deliver a comprehensive post-exercise report, with insights, observations, and prioritized recommendations for strengthening your response maturity.

WHY CHOOSE US?

Threat-Realistic Scenarios:

We simulate real-world attacker behavior, not generic exercises, to reflect today's threat landscape.

Multi-Tier Facilitation:

Exercises are adapted for technical teams, executive leadership, or both, ensuring engagement at all organizational levels.

Expert-Led Insights:

Our facilitators bring decades of hands-on incident response and governance experience to guide discussion and capture meaningful takeaways.

Post-Exercise Roadmap:

We don't just report gaps, we help you translate findings into prioritized next steps for response improvement.

OUTCOMES YOU CAN EXPECT:

Led by seasoned cybersecurity professionals, our exercise simulates real-world scenarios: ransomware outbreaks, data breaches, insider threats, using industry-aligned best practices and attacker logic, to achieve:

- Real-world evaluation of incident response
- Identified gaps in people, process, and tools
- Actionable improvements for faster recovery
- Stronger cross-team coordination
- Increased organizational confidence and readiness

EMPOWERING IR READINESS

Our Cybersecurity Tabletop Exercises are available in flexible formats to meet the unique needs of your organization. Whether you're validating your technical response, aligning executive decision-making, or running a comprehensive simulation across departments.

We offer tailored sessions that fit your goals, scope, and time constraints:

- ✓ **Standard:** One, tailored, incident scenario
- ✓ **Advanced:** Multiple scenarios, deeper analysis
- ✓ **Executive:** Board-level response simulation

WHY IT MATTERS

Even the best plan fails without practice. Tabletop exercises turn theory into action, aligning people, processes, and systems before a real incident forces the issue. We help you stress-test your readiness, so when threats strike, your team responds with clarity and **confidence**.
