

CONTINUOUS PENETRATION TESTING

AI agents test continuously; certified consultants verify every finding.

Annual pentesting shows where you stood on one day of the year. AI agents work alongside security consultants to test continuously, with unlimited retesting so a fix is verified the moment you make it. Coverage spans web apps, APIs, cloud and on-prem.

AGENTIC PENTESTING, VERIFIED BY HUMANS.

WHY DIGITALERA

Penti agentic AI

Powers continuous mapping and exploitation at scale.

Unlimited retesting

Every fix verified at no extra charge, until it's clean.

White-glove support

A dedicated success team and on-demand access to pentesters.

Audit-ready reporting

Mapped to SOC 2, PCI DSS, ISO 27001 and HIPAA.

WHAT YOU CAN EXPECT

- Testing that keeps pace with every sprint
- Fixes verified the moment you make them
- Video evidence for auditors, insurers and boards
- Ongoing proof for SOC 2, ISO 27001 and PCI DSS
- Findings ranked by what's truly exploitable

INCLUDED IN EVERY TIER

- ✓ Remediation roadmap
- ✓ Video evidence per finding
- ✓ Downloadable PDF reports
- ✓ Unlimited retesting

How it's scoped

4 tiers (Launch to Enterprise) scale scope, with the same core capabilities in each. Scoping is AI-assisted.

Right fit if you need regular evidence for SOC 2, ISO 27001 or PCI DSS, or your environment outpaces an annual pentest.

Something else first if you need one scoped engagement (Penetration Testing), want exposure tracking first (Vulnerability Management), or are mid-incident.

Talk to an expert
