

VULNERABILITY MANAGEMENT PROGRAM

Continuous discovery, expert prioritization, guided remediation.

Cyberattacks rarely begin with brute force. They start with a known, unpatched vulnerability. This service adds expert prioritization, remediation guidance and program support, so you can act decisively and prove measurable risk reduction.

SCAN DATA, TURNED INTO A LIVING ROADMAP.

Discover: full visibility

Agent-based and agentless scans across endpoints, servers, network, cloud and datacenter assets.

Prioritize: risk-based scoring

Scored by threat intel, CVSS severity, exploitability and asset criticality, so the urgent fixes come first.

Remediate: actionable guidance

Contextual mitigation and step-by-step remediation guidance for your IT or DevOps team.

Sustain: human-guided oversight

A dedicated team validates findings and coordinates fixes with your IT or DevOps team until they close.

WHY DIGITALERA

3 tiers by maturity

Monthly, weekly or continuous scanning, matched to your team.

Analyst-reviewed results

A dedicated team validates findings before they reach you.

Framework-aligned

NIST CSF, ISO 27001, HIPAA and PCI DSS.

Builds on your scanner

Your existing scan data becomes the baseline.

WHAT YOU CAN EXPECT

- A recurring, structured program in place of ad hoc scans
- Findings ranked by real risk across every asset
- Documented, audit-ready evidence of vulnerability management
- Remediation guidance your IT or DevOps team can execute
- Measurable risk reduction you can show a board

WHAT YOU RECEIVE

- ✓ Prioritized findings
- ✓ Remediation guidance
- ✓ Heatmaps and trend reports
- ✓ Compliance-aligned reporting

Getting started

Your current scan data becomes the baseline. We need asset inventory access and an owner on your IT or DevOps side.

Right fit if you run ad hoc scans, or your team is buried in reports with hundreds of undifferentiated findings.

Something else first if you want exploitability tested (Continuous Penetration Testing), haven't assessed your posture (Skyrocket), or you're mid-incident.
