

INCIDENT RESPONSE PLAN DEVELOPMENT

A customized incident response plan, built before you need it.

Most organizations only think about incident response mid-incident, which is the most expensive time to think about it. We build your plan in calm weather: a customized IR plan aligned to your environment and industry, refined through simulation exercises.

BUILD A PLAN BEFORE YOU NEED ONE.

Understand: your environment

A named IR consultant learns your infrastructure, operational context and industry obligations before drafting anything.

Build: a customized plan

A written incident response plan aligned to your environment and industry standards, shaped around how your organization works.

Simulate: test under pressure

Simulation exercises put the plan through realistic scenarios, so gaps surface in practice, ahead of a real incident.

Validate: tabletop option

A tabletop with IT, legal, communications, HR and executives proves the plan holds up, as the validation step.

WHY DIGITALERA

Dedicated consultant

The same IR consultant stays on your case, start to finish.

Aligned to your industry

Customized to your environment and industry standards.

Built to be tested

Simulation exercises test and refine it before you need it.

Full-service support

From forensic investigation to managed security services.

WHAT YOU CAN EXPECT

- A customized plan aligned to your industry standards
- A plan refined through simulation exercises
- Decisions made calmly, before an incident
- A named consultant who already knows your environment
- A clear next step into tabletop testing or a retainer

WHAT YOU RECEIVE

- ✓ Customized IR plan
- ✓ Simulation exercises
- ✓ Refinements from test results
- ✓ Tabletop validation (optional)

How it's scoped

Project-based, scoped on a discovery call. Pairs with tabletop exercises to validate the plan and a retainer for access.

Right fit if you have never documented an incident response plan and want one built before an incident forces it.

Something else first if you have a plan that's never been tested (Tabletop Exercise) or you're under attack now (call the emergency line).
