

NETWORK ASSESSMENT

Diagrams, heatmaps and a prioritized plan across 5 layers.

Most IT teams run a network they can't fully see: the map is stale and the patch panel was labeled by someone who left. This 5-layer evaluation gives you diagrams, an inventory, benchmarked numbers and a plan that separates what to fix from what to fund.

KNOW WHAT YOU RUN. FIX IT IN THE RIGHT ORDER.

WHY DIGITALERA

Read-only access

No outage window required, and testing is agreed with you.

Artifacts you keep

Visio diagrams, inventory and heatmaps are yours.

Named tooling

iPerf, Auvik, Hamina and NetSpot show how each number was made.

Fixed quote

Priced by tier and site.

WHAT YOU CAN EXPECT

- An accurate map of what you actually run
- Benchmarked bandwidth, latency, jitter and loss
- Wireless coverage shown as heatmaps
- Every patch panel port mapped to its endpoint
- A plan separating what to fix from what to fund

WHAT YOU RECEIVE

- ✓ Physical and logical diagrams
- ✓ Device inventory with lifecycle
- ✓ Prioritized findings
- ✓ Follow-up consultation

How it's scoped

3 tiers (Basic, Standard, Enterprise) banded by users and sites. Starts with a 20-minute scoping call.

Right fit if your network map is out of date, or every budget conversation starts from memory.

Something else first if you need cabling or closets built (IT Infrastructure Deployment) or you're mid-incident (call the emergency line).
