PHYSICAL SECURITY SYSTEMS ASSESSMENT

A structured review of access control, cameras and alarm systems.

Badge readers added over a decade, cameras with 3 different retention settings, an alarm panel nobody remembers programming. This assessment documents what you have, where coverage gaps are, and whether the systems are ready for planned IT work.

KNOW WHAT YOUR ACCESS CONTROL AND CAMERAS COVER.

Access control coverage

Every badge reader and controlled door mapped, with firmware and credential management reviewed for gaps.

Camera coverage and retention

Blind spots identified, retention settings checked against your compliance obligations, storage capacity reviewed.

Alarm and monitoring integration

Whether alarm events actually reach someone, and whether the panel still matches how the building is used.

Integration readiness

Whether current systems can support planned network or IT closet work, or need to be addressed first.

WHY DIGITALERA

Systems stay live
Walkthrough and log review with no downtime.

3 systems, one review
Access control, CCTV and alarm reviewed together.

Integration-ready findings
Scoped against your planned IT work.

Fixed quote
Priced by site count.

WHAT YOU CAN EXPECT

- A documented current state of physical security
- Coverage gaps and camera blind spots identified
- Retention checked against compliance obligations
- Answers for insurance and compliance reviews
- Findings that scope the follow-on build

WHAT YOU RECEIVE

- Coverage map
- Gap list
- Integration readiness summary
- Findings for planned IT work

How it's scoped
2 tiers: single-site or multi-site. Often the first step before an IT closet buildout or camera refresh.

Right fit if you're planning a closet buildout or refresh, or access control and cameras have grown without documentation.

Something else first if you already know what to replace (IT Infrastructure Deployment) or want ongoing monitoring (Managed Networking).
