

PENETRATION TESTING SERVICES

External, internal, web application and wireless testing, led by a consultant.

A dedicated penetration testing consultant leads every engagement, built for your environment, whether a lean IT team or a large enterprise. You learn which attack paths are genuinely exploitable, tested rather than assumed.

REAL ATTACKS, SIMULATED. REAL DEFENSES, STRONGER.

WHY DIGITALERA

Led by a consultant

A single consultant who knows your business, start to finish.

Certified testers

Consultants hold OSCP and GPEN certifications.

Built for your environment

Hybrid, legacy or compliance-driven infrastructure: the test adapts.

Clear from start to finish

Prioritized findings, remediation guidance and follow-up support.

WHAT YOU CAN EXPECT

- Independent verification of controls for auditors and boards
- Proof of which attack paths are genuinely exploitable
- Findings that work for IT teams and executives alike
- Remediation your team can execute, with owners attached
- Re-testing to confirm fixes closed the gap

WHAT YOU RECEIVE

- ✓ Findings rated by severity
- ✓ Executive and technical reports
- ✓ Remediation guidance with owners
- ✓ Optional re-test to verify fixes

How it's scoped

Project-based, with scope and timeline confirmed on a discovery call. Want testing all year? Ask about PTaaS.

Right fit if you need independent verification of controls for an audit, insurer or client, or proof that a fix worked.

Something else first if your concern is APIs (API Security Assessment), you suspect a live compromise (Compromise Assessment), or haven't benchmarked yet (Skyrocket).

Talk to an expert
