

IOT/OT SECURITY ASSESSMENT

Discovery and risk assessment for IoT and operational technology.

Building automation, HVAC controllers, badge readers, cameras, industrial sensors: most of what runs on a modern network was never provisioned by IT. We discover every device, score its risk and show where segmentation would reduce exposure.

FIND THE DEVICES YOUR INVENTORY DOESN'T KNOW ABOUT.

WHY DIGITALERA

Passive discovery

Nothing is probed in a way that could disrupt a live system.

No device downtime

Passive network discovery on live networks.

Full inventory

Every device your existing tools can't see.

Fixed quote

Priced by site and estimated device count.

WHAT YOU CAN EXPECT

- An inventory of every IoT and OT device
- Risk scores ranked by what each device can reach
- A segmentation plan built on a real inventory
- Proof for auditors and insurers that devices are accounted for
- Unpatched and out-of-support firmware identified

WHAT YOU RECEIVE

- ✓ Device inventory
- ✓ Risk score per device
- ✓ Segmentation plan
- ✓ Vendor and firmware inventory

How it's scoped

Passive network discovery, with no device downtime. Fixed quote based on site and estimated device count.

Right fit if you suspect more is connected than IT has inventoried, or you run building automation or industrial controls.

Something else first if you have an inventory and need the network redesigned (Managed Networking), or you're mid-incident (call the emergency line).
