

VIRTUAL CISO SERVICES

Executive cybersecurity leadership, without the full-time headcount.

A board that wants evidence you manage cyber risk systematically needs someone accountable for the program. Your vCISO is a certified executive (CISSP, CISM) who builds your roadmap and turns risk into board-ready reporting, backed by a full MSSP.

STRATEGIC LEADERSHIP. FRACTIONAL COST.

WHY DIGITALERA

Certified executive

A CISSP and CISM credentialed vCISO, the same person on every call.

3 models

Lite, Full or Project-Based, sized to the CISO function you need.

Strategy plus execution

As a full MSSP, we can implement and manage what we recommend.

Cross-industry

Financial services, healthcare, energy and government.

WHAT YOU CAN EXPECT

- A named, accountable owner for cyber risk
- A roadmap sequenced to your framework
- Board-ready reporting in executive language
- Direction and delivery in one relationship
- Executive leadership without a full-time salary

WHAT YOU RECEIVE

- ✓ Security roadmap
- ✓ Board-ready risk reporting
- ✓ Policy and IR plan direction
- ✓ Regular advisory sessions

How it's scoped

Lite: quarterly advisory. Full: monthly advisory, roadmap, policies and IR plan. Project-Based: one targeted initiative.

Right fit if a board or investor wants evidence of systematic risk management and a full-time CISO isn't justified.

Something else first if you need a plan built (Policy Development), haven't benchmarked yet (Skyrocket), or you're mid-incident (call the emergency line).
