SKY ROCKET by DIGITALERA

SKYROCKET YOUR AI

AI READINESS ASSESSMENT

4 to 6 weeks · 6 dimensions · a named consultant

THE CONFIDENCE STANDARD · SECURE AI ADOPTION, STAGE 1

AI is already inside. Make it deliberate.

01 ASSESS · YOU ARE HERE | 02 PRIORITIZE | 03 IMPLEMENT | 04 OPERATE

Everyone starts at Assess, whatever their size.

Your people are already using AI, pilots are multiplying in departments that don't know about each other, and customer data is being pasted into tools nobody approved. Skyrocket Your AI scores where you stand across 6 dimensions, closes the live exposure first, then sequences adoption.

4 to 6 weeks, or 2 to 3 compressed

1 **Interview**
Business and technical teams
Live interviews to see how AI is really being used across the organization.

2 **Map and discover**
Environment and shadow AI
Collaborative mapping of your actual environment, with a full license and tool inventory.

3 **Score**
6 dimensions, 0 to 100
Evidence-based scoring, rolled into one AI Readiness Score and one of 5 tiers.

4 **Walkthrough**
A named consultant
Executive walkthrough of every finding, then 2 follow-up sessions after delivery.

Grounded in NIST AI RMF · ISO/IEC 42001 · MITRE ATLAS · AI TRiSM · EU AI Act

What we score

- Strategy and vision
- Data foundation
- Process readiness
- Technology and infrastructure
- People and skills
- Governance, risk and security

Includes shadow AI discovery.
Governance is weighted more heavily for regulated institutions.

Score, then tier

Nascent 0–19
Whatever AI exists is shadow AI.

Developing 20–39
Pilots in pockets, licenses unused.

Operational 40–59
In production, governance uneven.

Advanced 60–79
AI in core workflows, with owners.

AI Forward 80–100
Adoption is systematic and routine.

What you keep

AI Posture Report
Score, 6-dimension posture map, findings and your top risks, named.

3 to 5 quick wins
Deliverable within 30 days, with a 90/180/365-day roadmap behind them.

License and tool inventory
What you pay for, and what nobody uses, plus an evidence appendix.

A comprehensive report.
Then a 30-day Quick-Win Sprint, if you want one.

Right fit if you suspect AI is in use across the business but can't say where, by whom or with what data.

Something else first if you're mid-incident (call the emergency line), your core security was never benchmarked (Skyrocket Cyber), or data is the blocker.
