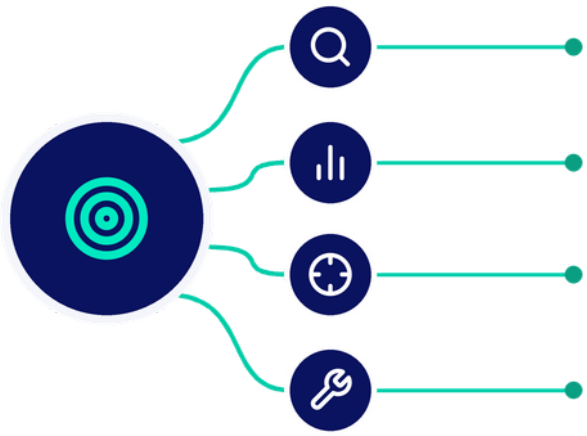
CTEM AND REMEDIATION

Continuous exposure management and risk-based remediation.

Traditional vulnerability management produces a list. CTEM produces a sequence: continuous discovery of what's exposed, ranked by what's genuinely exploitable, with disruption-free remediation behind it. We meet you wherever you are on the maturity curve.

EVERY EXPOSURE, RANKED BY WHAT'S EXPLOITABLE.



Continuous exposure discovery

Ongoing vulnerability and asset discovery, with no quarterly scan to review once and forget.

Exposure-driven prioritization

Findings ranked by what's actually exploitable in your environment, since not every vulnerability carries the same risk.

Breach and attack simulation

Real-world testing against your controls, measured against what an attacker would actually hit.

Disruption-free remediation

Patch and configuration management built for operational integrity, minimizing downtime and faulty-update risk.

WHY DIGITALERA

Vendor-agnostic method
A documented 4-step method, so the shortlist fits your environment.

Deployed with tuning
Professional Services stays through the tuning period after go-live.

Run by people, weekly
Someone has to triage and drive remediation every week.

No lock-in
Exit at contract renewal, with no penalty for leaving.

HOW WE SELECT

1. **Assess**
   Coverage gaps and ranked risk, before any product demo.
2. **Shortlist**
   2 to 3 fits, scored on your environment and budget.
3. **Deploy and integrate**
   Configure, integrate and tune, with support after go-live.
4. **Run it or hand it back**
   Move into the matching managed service, or keep it in-house.
