DATA PROTECTION

Discovery, classification, DLP, encryption and sovereignty.

You can't protect data you can't find, and most organizations have sensitive data in places nobody has looked recently. We start with discovery and classification, then layer loss prevention, encryption and tokenization matched to your compliance obligations.

KNOW YOUR DATA. CONTROL WHAT HAPPENS TO IT.

Discovery and classification
Find sensitive data across endpoints, cloud and SaaS before deciding how to protect it. It's the step most programs skip.

Data loss prevention
Stop accidental leaks and insider exfiltration in real time, across email, cloud and endpoint.

Encryption, masking, tokenization
Render sensitive data useless if it leaves the environment, without breaking the applications that use it.

Compliance-mapped controls
Built to satisfy CMMC, HIPAA, PCI DSS and GDPR, as documented evidence you can hand an auditor.

WHY DIGITALERA

Vendor-agnostic method
A documented 4-step method, so the shortlist fits your environment.

Deployed with tuning
Professional Services stays through the tuning period after go-live.

Compliance-mapped
Controls built to meet CMMC, HIPAA, PCI DSS and GDPR evidence.

No lock-in
Exit at contract renewal, with no penalty for leaving.

HOW WE SELECT

1. **Assess**
Coverage gaps and ranked risk, before any product demo.

2. **Shortlist**
2 to 3 fits, scored on your environment and budget.

3. **Deploy and integrate**
Configure, integrate and tune, with support after go-live.

4. **Run it or hand it back**
Move into the matching managed service, or keep it in-house.

WHERE IT CONNECTS

Runs with
Identity Management

Also relevant
API Security Assessment

Compliance
Compliance Readiness

Right fit if you can't say where sensitive data lives, or you must evidence CMMC, HIPAA, PCI DSS or GDPR controls.

Something else first if your concern is APIs (API Security Assessment) or you need audit-ready evidence first (Compliance Readiness).
