

ENDPOINT PROTECTION AND RESPONSE

EPP, EDR and XDR chosen for your environment, then deployed and tuned.

The device is still where most attacks start and where most damage happens first. We help you choose between EPP, EDR and XDR based on your environment and risk, then deploy and tune the platform and, if you want, run it for you around the clock.

STOP THE THREAT BEFORE IT LANDS.

Prevention-first defense

Stops advanced attacks, including fileless, living-off-the-land and ransomware precursors, before they execute.

Detection and response

Behavioral detection and investigation across endpoints, correlated with network and identity signal where XDR is in scope.

Fits the environment you run

On-prem, cloud, hybrid, remote workforce, contractor and third-party devices, without breaking performance or usability.

Containment where it matters

Application allowlisting and ransomware-specific containment for high-risk or regulated environments.

WHY DIGITALERA

Vendor-agnostic method

A documented 4-step method, so the shortlist fits your environment.

Deployed with tuning

Professional Services stays through the tuning period after go-live.

Finish what you own

The cheapest first move is often finishing the tools you already own.

No lock-in

Exit at contract renewal, with no penalty for leaving.

HOW WE SELECT

1

Assess

Coverage gaps and ranked risk, before any product demo.

2

Shortlist

2 to 3 fits, scored on your environment and budget.

3

Deploy and integrate

Configure, integrate and tune, with support after go-live.

4

Run it or hand it back

Move into the matching managed service, or keep it in-house.

VENDOR ROSTER

Managed detection and response

Right fit if you're choosing or replacing an endpoint platform, or you own an EDR license that's mostly unused.

Something else first if you're not sure endpoint is your biggest gap (start with Skyrocket Cyber Maturity) or you're mid-incident (call the emergency line).

Talk to an expert
