

# IT INFRASTRUCTURE DEPLOYMENT

Structured cabling, AV and IT hardware, closets and enterprise automation.

Every network, camera, access-controlled door and rack depends on physical infrastructure someone had to design, run and terminate correctly. This is that work: 4 scoped deployment engagements, delivered by certified technicians with real documentation.

## THE PHYSICAL LAYER, BUILT TO LAST.

### WHY DIGITALERA

#### Built as one system

Cabling, hardware, closets and automation designed together.

#### Certified technicians

Delivered on-site by certified technicians, with a person to call.

#### Documented handoff

Labeled, tested and as-built, so your team can run it.

#### Security-first builds

Access control and segmentation considered from day one.

### HOW IT'S DELIVERED

- 1 Scope**  
Each discipline scoped against your space and requirement.
- 2 Specify**  
Tech-agnostic hardware matched to the space and use case.
- 3 Deploy**  
Built, labeled and tested by certified technicians.
- 4 Hand off**  
As-built documentation, then optional Managed Networking.

#### WHERE IT CONNECTS

**Precedes this**  
Network Assessment

**Follows this**  
Managed Networking

**Also relevant**  
Physical Security Assessment

**Right fit if** you're building out cabling, a closet, AV or access control, or fixing what an assessment found.

**Something else first if** you want ongoing monitoring (Managed Networking), or you're unsure what's wrong today (start with Network Assessment).
