

IDENTITY MANAGEMENT

IAM, PAM, PIM, MFA and passwordless authentication.

Credential misuse is still one of the most common ways in. We combine the identity controls that fit how your organization works: least privilege enforced, lateral movement blocked, high-risk accounts monitored in real time, without slowing people down.

EVERY IDENTITY. EVERY ACCESS POINT. LOCKED DOWN.

Privileged access management

Blocks unauthorized access and privilege escalation on the accounts that matter most.

Identity and access management

Automates and controls user access across the organization, replacing the spreadsheet most teams still track it in.

Multi-factor and adaptive auth

Stronger access controls without the friction that pushes people toward workarounds.

PIM and passwordless

Real-time monitoring of high-risk accounts, plus passwordless options that remove weak passwords as an attack path.

WHY DIGITALERA

Vendor-agnostic method

A documented 4-step method, so the shortlist fits your environment.

Deployed with tuning

Professional Services stays through the tuning period after go-live.

Specialists on call

Direct access to identity security specialists when it matters.

No lock-in

Exit at contract renewal, with no penalty for leaving.

HOW WE SELECT

- 1 Assess**
Coverage gaps and ranked risk, before any product demo.
- 2 Shortlist**
2 to 3 fits, scored on your environment and budget.
- 3 Deploy and integrate**
Configure, integrate and tune, with support after go-live.
- 4 Run it or hand it back**
Move into the matching managed service, or keep it in-house.
